Education

Universidad Autónoma de Nuevo León - Faculty of Physical and Mathematical Sciences
Bachelor's Degree in Multimedia and Digital Animation

Despite the name of the degree, 80% of what they taught us was software development of all types like 3d graphic environments, data base optimization and best practices, mobile applications, web development with various languages like C# or PHP and, above all, to be self-taught which has helped me in both university and professional tasks.

Skills with professional experience

C#, .NET, Angular, Typescript, Cosmos DB, Git, Scrum, HTML5, CSS3, JavaScript, SQL Server, Selenium, Self-learning, RESTful API, Excel, Problem solving, Critical thinking, Teamwork.

Skills with personal experience

Java, Python, PHP, React.js, MySQL, MongoDB, Kotlin, Laravel.

Experience

Software Engineer I (Fullstack) en Ellucian
(2023 – 2026)

Web developer using .NET and Angular for an international administrative platform for universities. Responsibilities included managing optimal API calls with high-density data, developing a search and matching system for potential student scholarships, and implementing customized financial aid web pages for each university.
